

Tanishq Kaushal

Software Development Engineer

✉ tanishqkrk@gmail.com 📍 New Delhi, India 🌐 Portfolio 🌐 LinkedIn 🌐 Github

Software Engineer focused on building complex products from the ground up, from system design to polished user experiences. I thrive on solving difficult problems, owning products end-to-end, and turning ideas into software people actually use.

PROFESSIONAL EXPERIENCE

Asymmetri

Software Development Engineer 2

08/2024 – Present

Software Development Engineer

07/2023 – 2024

- **Designed and owned the architecture for Pearl**, an internal documentation platform used company-wide, building a high-performance client-side PDF generation system with a custom JavaScript compiler supporting structured data, rich text, spreadsheets, tables, image editing, and high-quality PDF export; built the accompanying admin system using Next.js, TypeScript, Firebase, and Tailwind CSS.
- **Designed and built Genetico's web platform**, owning the system design for a responsive, animation-heavy public website and CMS-driven administration platform; implemented dynamic content management with Payload CMS and Supabase and built reusable interfaces using Next.js, TypeScript, Tailwind CSS, Framer Motion, and an internal UI library.
- **Built the frontend for ReformAI**, a property buying, selling, and renovation platform, as part of a 3-person engineering team; owned the homeowner, service-provider, and admin experiences and contributed to system architecture, AI-powered property visualization, maps, and a middleware layer handling three-language internationalization and role-based access control.
- **Built Bookleaf Publishing's browser-based book-cover editor**, enabling hundreds of daily users to design front, back, and spine covers with HTML Canvas, edit and place custom images, apply administrator-managed templates, and export production-quality covers; contributed to the system architecture and implemented the editor and supporting admin functionality.
- **Built the backend API for Quicli**, a WhatsApp-based consultation platform serving hundreds of daily users; integrated the WhatsApp Business Platform, Meta Business API, and OpenAI SDK to support AI-assisted consultation workflows and doctor-approved prescriptions using Node.js, Express.js, JavaScript, and Heroku.
- **Worked directly with clients and cross-functional teams** to understand requirements, translate business needs into technical features, and deliver production software; took ownership of features and development tasks across multiple projects while collaborating with engineers and interns after progressing to SDE II.
- **Improved Lighthouse performance scores** across multiple client websites by identifying and addressing frontend performance bottlenecks, optimizing page delivery and rendering, and improving overall site performance

EDUCATION

BCA (Bachelor of Computer Applications), Chandigarh University

08/2020 – 2023 | Punjab, India

ACHIEVEMENTS

LabLabAI OpenAI Stack Hackathon

02/2023 – 03/2023

Collaborated in a 3-person team to build HealthyAI, a cross-platform AI-powered health application using React, Django, Redis, and GPT-3.

SKILLS

Languages: TypeScript, JavaScript, PHP, HTML, CSS

Frontend: React, Next.js, Vue, Tailwind CSS, Framer Motion, HTML Canvas

Backend & APIs: Node.js, Express.js, Laravel, REST APIs

Data & Infrastructure: Firebase, Firestore, Supabase, NeonDB, Google Cloud, Heroku, Render, Vercel

Tools & Platforms: Git, Payload CMS, OpenAI SDK, Meta Business API, WhatsApp Business Platform
